

## TMS (Team Management System)

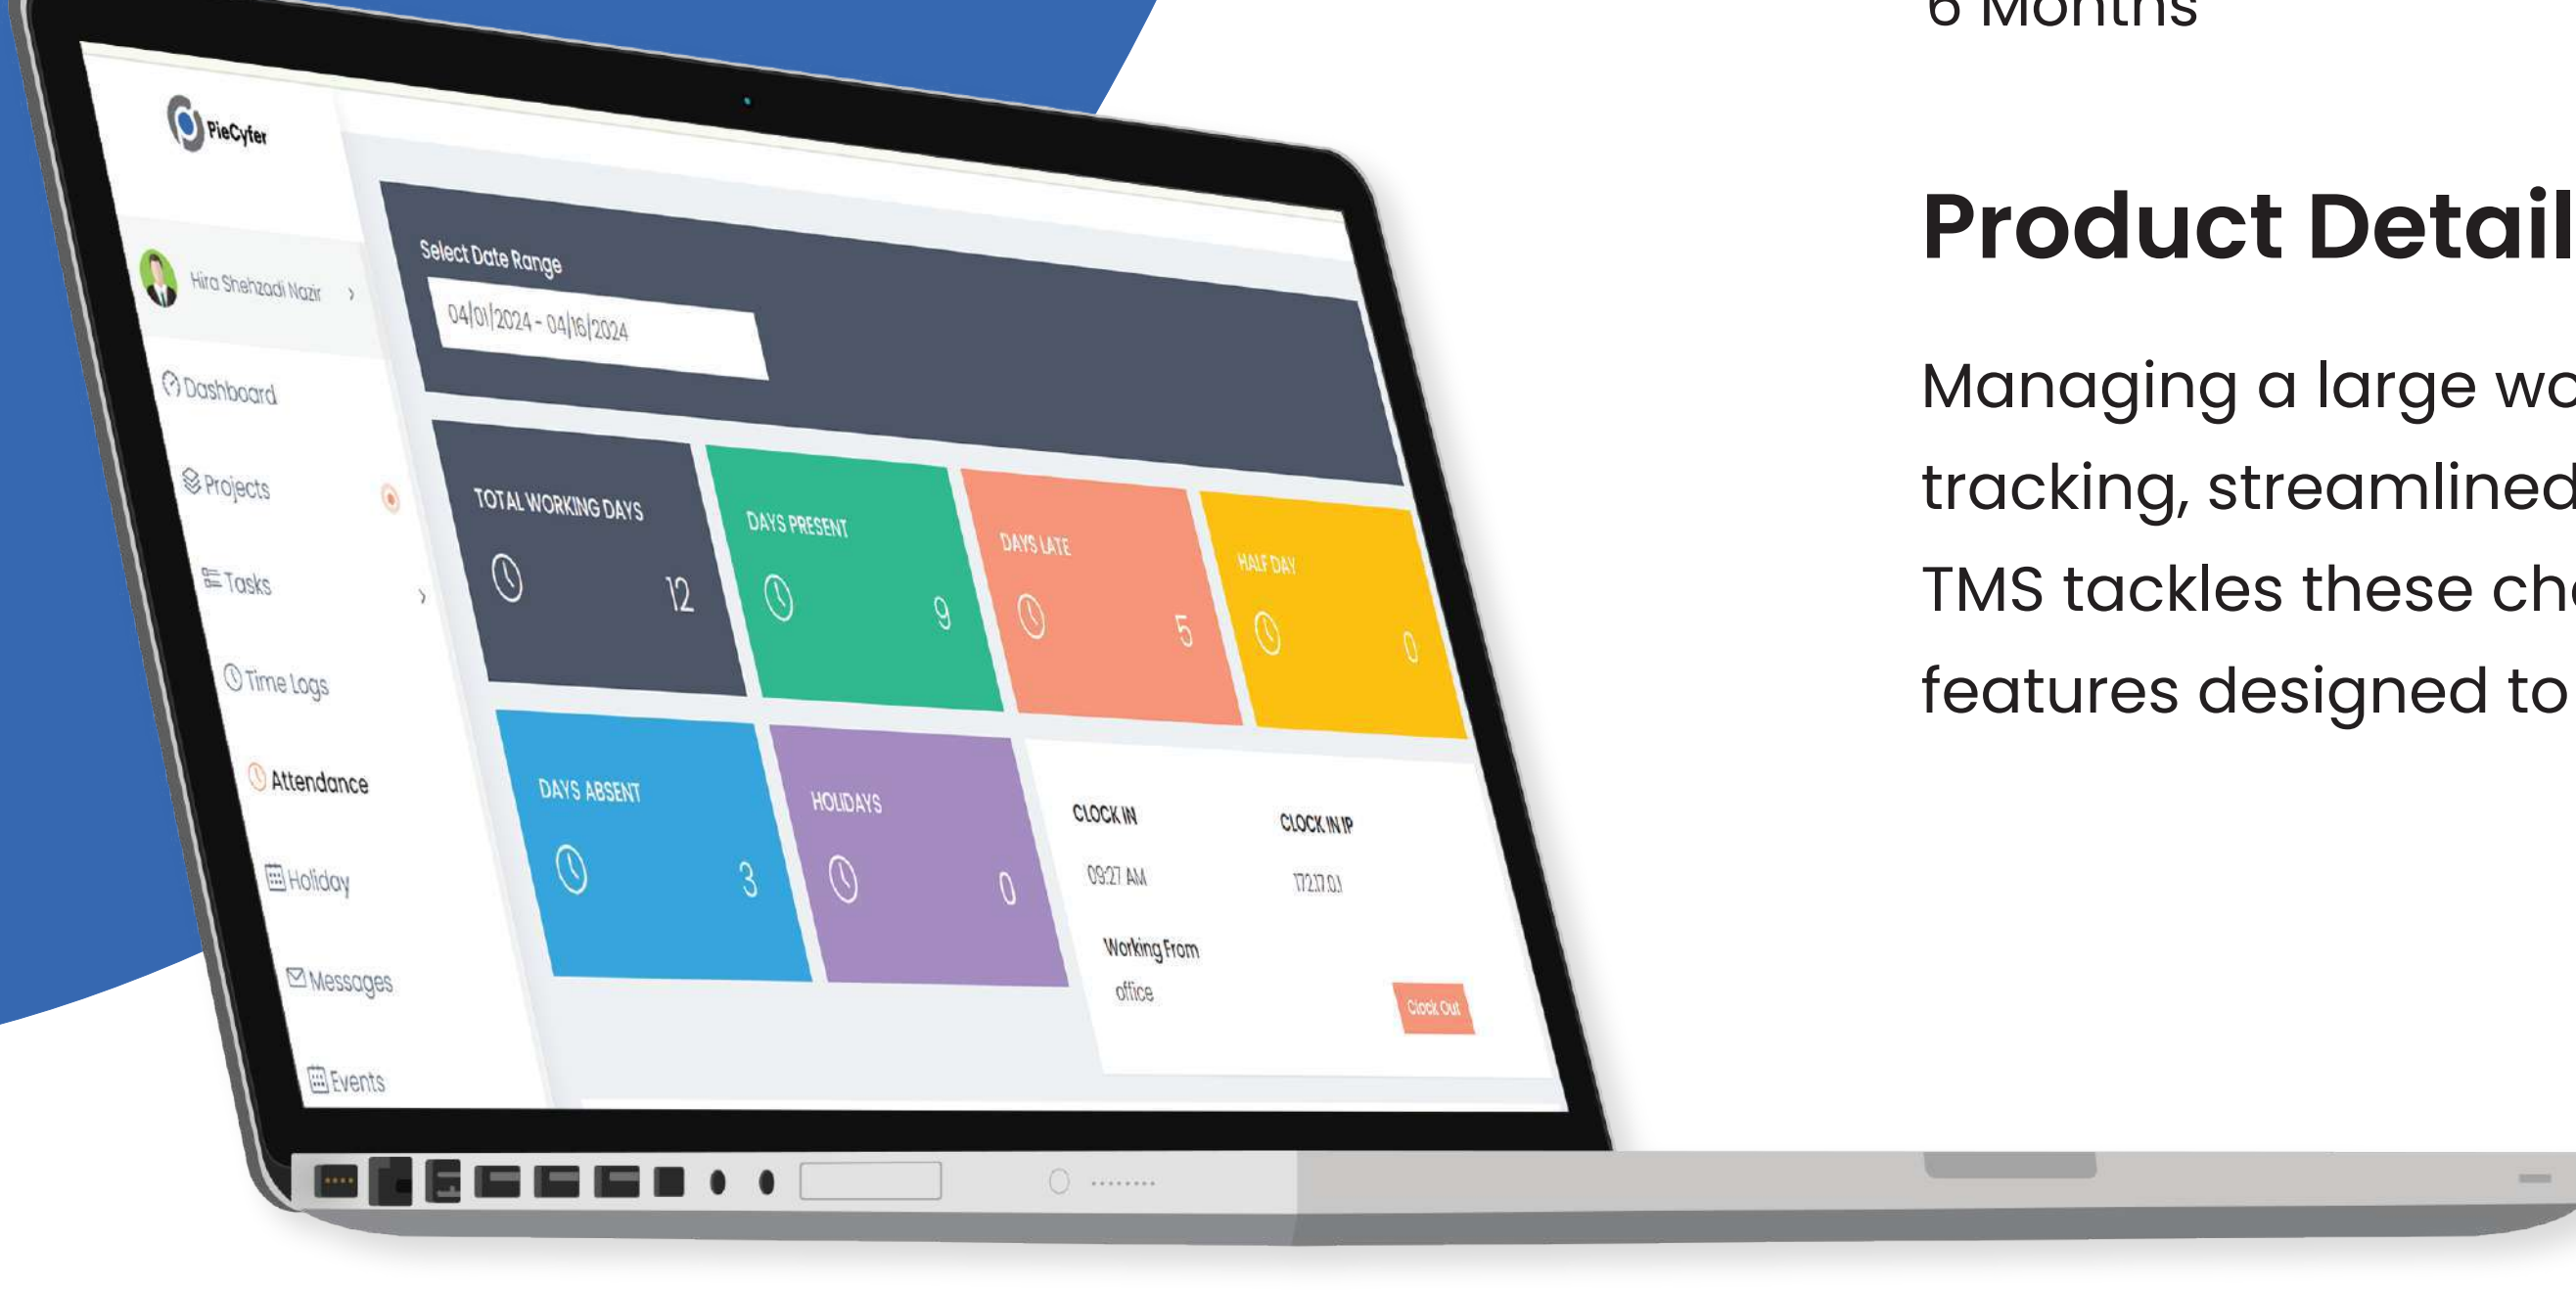

Human Resources & Project Management

### Project Duration

6 Months

### Product Details / Client Requirements

Managing a large workforce can be complex, requiring efficient time tracking, streamlined workflows, and centralized data management. TMS tackles these challenges by providing a comprehensive suite of features designed to

#### 1 Optimize workforce management

Track employee time, analyze work patterns, and optimize project allocation.

#### 2 Simplify HR processes

Automate attendance tracking, leave management, and payroll processing.

#### 3 Boost project efficiency

Manage tasks, monitor workflows, and track project progress in real-time.

## Challenges

### Improve efficiency and productivity

Streamline administrative tasks and empower employees to focus on high-value activities.

### Gain real-time insights

Obtain real-time data on workforce performance & project progress for informed decision-making.

### Reduce administrative burdens

Automate repetitive tasks and centralize employee data for easy access.

## Solution

Addressed these needs with the following features,

#### Project Management

Plan, track, and collaborate on projects with task management boards and real-time progress monitoring.

#### Attendance Management

Track employee time with clock-in/out functionality, analyze trends, and generate reports.

#### Process and Workflow Monitoring

Gain insights into team workflows, identify bottlenecks, and optimize processes for efficiency.

#### Task Management

Assign tasks, track progress, collaborate with team members, and ensure project deadlines are met.

#### Leave and Time-Logs

Centralize leave requests, manage approvals, and track employee time logs for payroll

#### Event Management

Manage internal events, track attendance, and streamline communication with employees.

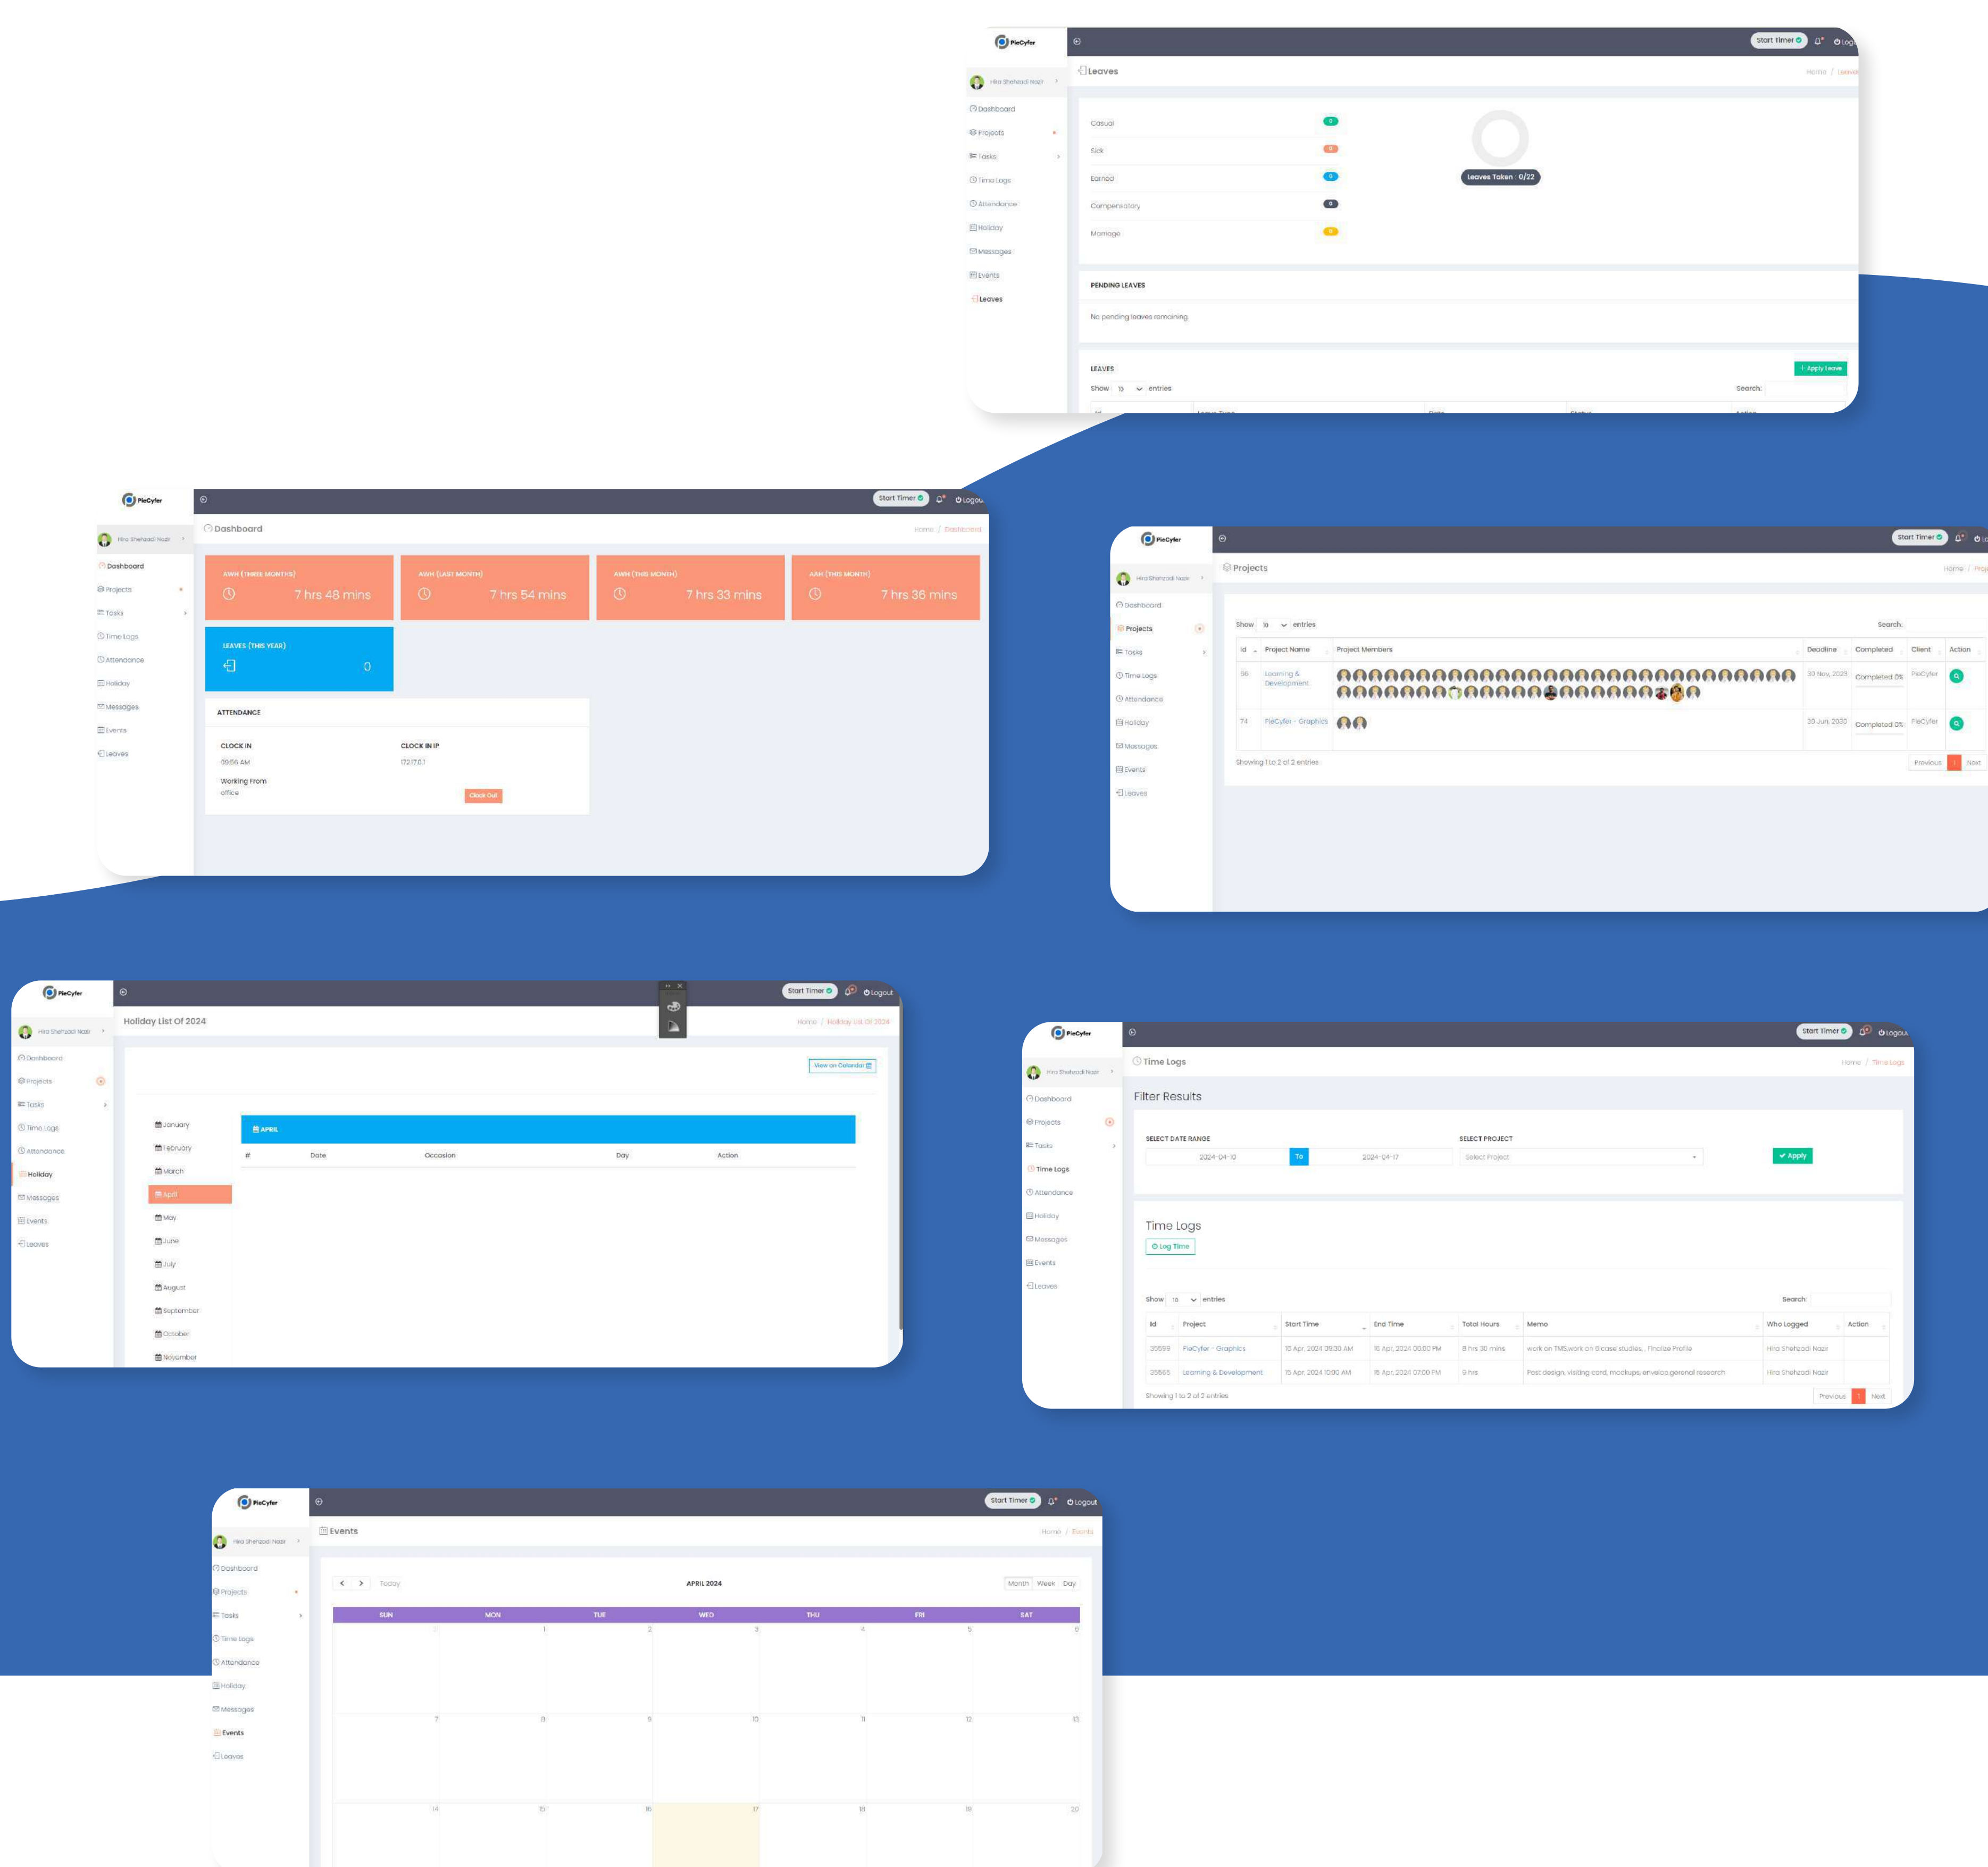

#### Invoicing and Payroll Solutions

Simplify invoicing and payroll processes with integrated solutions.
